The Company identified the universe of files for each segment of the review. Based on the universe sizes, random sampling was utilized to select the files reviewed during this examination.

Delaware Market Conduct Examination Reports generally note only those items to which the Department, after review, takes exception. An exception is any instance of Company activity that does not comply with an insurance statute or regulation. Exceptions contained in the Report may result in imposition of penalties. Generally, practices, procedures, or files that were reviewed by Department examiners during the course of an examination may not be referred to in the Report if no improprieties were noted. However, the Examination Report may include management recommendations addressing areas of concern noted by the Department, but for which no statutory violation was identified. This enables Company management to review these areas of concern in order to determine the potential impact upon Company operations or future compliance.

Throughout the course of the examination, Company officials were provided status
