

**NON-RESIDENT
ADJUSTERS/PUBLIC ADJUSTERS
CONTINUING EDUCATION REQUIREMENTS**

Due to law change, Delaware non-resident adjusters and non-resident public adjusters will now be required to complete (12) credit hours of continuing education, three (3) of which shall be in ethic subjects during each biennial reporting period.

An individual that has been licensed consecutively for 25 years or holds a professional designation shall receive an automatic credit of six (6) credits in each biennium.

Delaware will reciprocate with an individual completing their C.E. in their home state or designated home state. If their home state or designated home state does not require C.E. completion, Delaware will accept approved course from another state as long as it meets Delaware's 12 credit requirement.

Adjusters licensed for the lines of Surety and/or Marine and Transportation are exempt from completing continuing education.

The Department will grant extensions for good cause shown. The extension shall not exceed twelve (12) months. The extension will not alter the requirements or due date of the succeeding biennium period. "Good cause" includes disability, natural disaster, or other extenuating circumstances. Each request for extension of time shall be in writing from the licensee and shall include details and any documentation to support the request. Each request must be received by the Department no less than thirty (30) days before the expiration of the biennium period.
