SCOPE OF EXAMINATION

The Market Conduct Examination was conducted pursuant to the authority granted by 18 Del. C. §§ 318 - 322 and covered the experience period of January 1, 2014 through December 31, 2016, unless otherwise noted. The purpose of the examination was to determine compliance by the Company with Delaware annuity suitability, replacement and surrender laws and regulations related to the sales and marketing of individual cash value life insurance, individual fixed annuities and individual variable annuities.
The examination was a targeted market conduct examination of the Company’s life insurance and annuity business in the following areas of operation: Company Operations and Management; Complaint Handling; Marketing and Sales; Producer Licensing; Policyholder Services; and Underwriting and Rating.

**METHODOLOGY**

This examination was performed in accordance with Market Regulation standards established by the Department and examination procedures suggested by the NAIC. While examiners report on the errors found in individual files, the examiners also focus on general business practices of the Company.

The Company was requested to identify the universe of files for each segment of the review. Based on the universe sizes identified, random sampling was utilized to select the files reviewed for this examination.

Delaware Market Conduct Examination Reports generally note only those items to which the Department, after review, takes exception. An exception is any instance of Company activity that does not comply with an insurance statute or regulation. Exceptions contained in the Report may result in imposition of penalties. Generally, practices, procedures, or files that were reviewed by Department examiners during the course of an examination may not be referred to in the Report if no improprieties were noted. However, the Examination Report may include management recommendations addressing areas of concern noted by the Department, but for which no statutory violation was identified. This enables Company management to review these areas of concern in order to determine the potential impact upon Company operations or future compliance.

Throughout the course of the examination, Company officials were provided status memoranda, which referenced specific policy numbers with citation to each section of law violated. Additional information was requested to clarify apparent violations. An exit conference was conducted with Company officials to discuss the various types of exceptions identified during the examination and review written summaries provided on the exceptions found.
